

## Zapcode Webnet

Zapcode Webnet is the web version of our popular real-time postcode to address data capture and validation software. Zapcode Webnet ensures your online customer databases are populated with only accurate, formatted information which is essential for effective customer relationship management and the efficient delivery of goods or services.

With Zapcode Webnet, a site visitor simply enters a postcode to return a full and valid address. Zapcode Webnet speeds up and simplifies form filling whilst enabling the accurate and efficient capture of name and address information. It helps to reduce the number of site visitor drop-offs and duplicated and uncompleted online registrations on websites as well as enhancing site usability for visitors. Zapcode Webnet can be integrated into any web page or form, and comes supplied with the Rapid Address File (RAF).

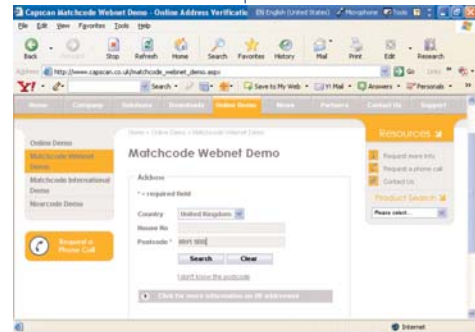

### FEATURES AND BENEFITS

#### Zapcode Webnet:

- Validates input address with the Rapid Address File (RAF) of 1.7 million UK postcodes.
- Returns a full postal address from a postcode.
- Provides rapid address capture for web forms.
